# CLEAR ARCH MOBILE APP

Engage Your Patients in Vital Signs Self-Monitoring with Our Convenient, Easy-to-Use Mobile Healthcare App

The **Clear Arch Mobile Application** gives patients the ability to retrospectively self-monitor their vital signs from any location, at any time, outside traditional clinical environments. This mobile app is designed with an intuitive and interactive interface that keep patients engaged with, and involved in their daily healthcare, allowing them to gain better insight into their ongoing health status. Through wireless communications, patients can easily transmit collected measurement data to the LifeStream™ dashboard for their healthcare team to view, assess, analyze, and act upon if needed.

Clear Arch Mobile App Product Overview
- Manage patients outside clinical settings
- Convenient, real-time remote monitoring of vital signs
- Data sets include blood pressure, blood sugar levels, pulse rate, temperature (and more)
- Software displays and transmits data collected from commercially available peripherals
- Share captured data with healthcare providers for prompt review and assessment
- Vital signs self-monitoring keeps patients actively involved in their own healthcare
- **Coming soon from Clear Arch Health!**
