

SINGLE SIGN-ON

New! From Clear Arch Health

Ensure Simple and Secure System-Wide Access with LifeStream™ Single Sign-On

LifeStream™ Single Sign-On (SSO) enables your staff to log in to the LifeStream dashboard with the same credentials they use for other applications. With full Security Assertion Markup Language (SAML 2.0) Single Sign-On integration, LifeStream SSO simplifies, speeds up and secures the login process. This means spending less time managing multiple usernames and passwords so you devote more time delivering excellent patient care and improving performance throughout your organization.

SSO INTEGRATION MADE SIMPLE:

- **UNIQUE IDENTIFIER**
User roles are mapped to LifeStream Roles with first/last name with unique identifier, such as employee ID.
- **STRENGTHENED SYSTEM SECURITY**
Create stronger passwords with multi-factor authentication schemes for more security.
- **STREAMLINED ACCESS MANAGEMENT**
Simplify new employee onboarding and access revocation upon employee separation with fewer time-consuming password resets.

Learn what LifeStream Single Sign-On can do for your healthcare business!
