

# GENESIS TOUCH® REMOTE PATIENT MONITOR

The Genesis Touch® Remote Patient Monitor touchscreen tablet is an ideal telehealth solution for monitoring vital signs and collecting patient health data. Easy-to-use and customizable, Genesis Touch guides patients seamlessly through the process of collecting clinical information. Collected data is then transmitted via cellular connection, or Wi-Fi, to LifeStream™ where healthcare teams can view and analyze the information. Complete with patient health questionnaires, integrated video capabilities and friendly audio and visual prompts (in multiple languages), Genesis Touch enables enhanced well-being by keeping patients engaged and connected with caregivers while outside clinical settings.

## Genesis Touch® Product Overview

- Monitor vital signs and transmit biometric data to LifeStream™ RPM dashboard
- Vital signs parameters include:
  - ! noninvasive blood pressure (NiBP)
  - ! pulse oximetry (SpO2)
