

LIFESTREAM™ CLINICAL MONITORING SOFTWARE

Remotely manage high-risk patients, cost effectively and efficiently, through a consolidated clinical dashboard.

LifeStream™ Clinical Monitoring Software provides convenient access to the essential patient data required by care providers to make informed decisions while monitoring patients remotely. Through its intuitive dashboard, LifeStream monitoring software enables health teams to efficiently evaluate, prioritize, and respond accordingly to patients' needs. Data from vitals, responses to pain scale questions, PHQ2 or PHQ9 questionnaires, and/or custom questions (coupled with information from video interactions), improves clinical decision making and facilitates the delivery of better healthcare.

PRODUCT FEATURES:

- **VIDEO INTEGRATION:**
Care providers may initiate and manage video consultations directly through LifeStream.
- **PATIENT HEALTH QUESTIONNAIRES:**
Providers may assign and schedule questionnaires, or customize questions, to access a range of conditions.
- **PAIN LEVEL SELF-ASSESSMENT:**
Wong-Baker FACES® pain rating scale alerts providers to changes in patient status for prompt intervention.
- **EDUCATIONAL VIDEO LIBRARY:**
Care providers may assign videos to help patients better manage their health and can monitor video views.
