

CLEAR ARCH MOBILE APP

Engage Patients in Vital Signs Self-Monitoring with Our Convenient, Easy-to-Use Mobile Healthcare App

The **Clear Arch Mobile Application** gives patients the ability to proactively self-monitor their vital signs from any location, at any time, outside traditional clinical environments. This mobile app is designed with an intuitive and interactive interface that keeps patients engaged and involved with their daily healthcare, allowing them to gain better insight into their ongoing health status. Through wireless communications, patients can use the mobile app to easily transmit collected measurement data through to the LifeStream™ dashboard for their healthcare team to view, assess, analyze, and act upon if needed.

CLEAR ARCH MOBILE APP PRODUCT OVERVIEW

- Manage patients outside clinical settings
- Offers real-time remote monitoring of vital signs
